

## Hurdles

Hurdle:  
databases/storage

How do we  
check if the  
user is a  
student?

How do you  
connect a  
student's  
schedule into  
the  
application?

How will the  
application  
notify the user  
to remind  
them?

What other  
school related  
programs do  
we need to  
conisder?

How to get  
permission to  
integrate with  
school  
accounts

## Features

Some map to show  
routes to next  
locations if people  
are worried about  
getting to places on  
time?

garnet gate  
connection?

Integration with  
Blackboard to get  
information about  
upcoming  
assignments or  
quizzes?

Integration  
with personal  
calendar?

Integration  
with Garnet  
Gate?

Direct Github  
Upload (for  
coding  
projects)

School and club  
assignments/projects/  
scheduling

Schedule  
planner

## Application Type

Navigation  
software

App  
(React or  
Swift?)

## Tech Stack

Website w/  
backend(?)
